**Acknowledgements:** Funding for this project was provided by the Wyoming Native Plant Society Markow Grant, and the U.S. Fish and Wildlife Service (USFWS) through a grant to the Wyoming Natural Diversity Database and the University of Wyoming Botany Department (grant #14AC00827). Collection of seeds for germination experiments was conducted under USFWS Permit #TE085324-2. Data at Soapstone Prairie were collected under permits #1082-2018 (2018), #1166-2019 (2019), and #4919647-26 (2020). Data collection at F.E. Warren Air Force Base was conducted with permission and assistance from Alex Schubert, USFWS Fish and Wildlife Biologist.

**Author Contributions:** Alice Stears, Daniel Laughlin, and Bonnie Heidel contributed to study conception and design and collected demographic data. Analysis was performed by Alice Stears with contributions from Daniel Laughlin, Maria Paniw and Roberto Salguero-Gómez. Alice Stears wrote the manuscript with contributions from all authors.

**Data Availability Statement:** All data that has not previously been published will be available from Zenodo. All code will be available to download from a public GitHub repository and archived on Zenodo.

<sup>25</sup> **Conflict of Interest Statement:** The authors declare no conflict of interest.
